# DISCLAIMER

The New Jersey Economic Almanac contains tens of thousands of pieces of information. Every reasonable precaution, along with a good deal of care was taken in its preparation. Despite all efforts it is possible that there may be errors in this book. They could originate from either the source material itself, or from mistakes of compilers and typists. In a work of this magnitude, the possibility of human error can never be fully eliminated.

If any piece of information is believed to be inaccurate, please contact the publisher. We are eager to eliminate all errors, and will be pleased to check a piece of information for you.

The publisher is aware that some users may apply the data in this book to various renumerative endeavors. Although all reasonable, responsible measures to insure total accuracy have been taken, we cannot be responsible for liability or loss suffered by users of the data. The information provided herein is believed to be accurate at the time of publication. No other guarantees are made or implied. The publisher warrants that only diligence and due care were used in the preparation of the volume.

# I. Introduction

# INTRODUCTION

The New Jersey Economic Almanac has been produced to fill the need for a detailed statistical volume covering the wide range of economic activity in New Jersey. In this first edition the editorial emphasis has been placed on providing some information on each aspect of the business and commercial life of the state. The goal has been to provide data that is detailed enough to be meaningful and useful to a broad cross-section of users without becoming too involved in any one single area.

Therefore in compiling the almanac, the primary editorial function has been to locate and abstract the most comprehensive and timely information available. No independent survey or studies were undertaken, and the data contained has been culled from eminently reliable sources cited at the end of each table. The data was organized and structured while keeping in mind the needs of users centrally concerned with the economy of New Jersey. With the possible exception of an editorial oversight, the almanac contains the best information available. If any area is omitted or under-represented it is probably due to a lack of appropriate resource material rather than a conscious omission on the part of the editor.

The New Jersey Economic Almanac has been divided into what amounts to 20 statistical chapters. The first is an overview of the state which is meant to provide a convenient one page synopsis of important economic facts. Most items covered here are dealt with in greater detail in later chapters. The next two sections, those on population and labor force, are the most detailed and wide ranging. Extra emphasis was planned for these two areas so as to provide a solid groundwork for any further investigation into the economic life of the state. The remaining seventeen chapters each focus on a single major aspect of business or commercial activity. Some chapters are longer and more detailed than others. In determining the number of tables and their length, the editor was guided by three factors; the relative importance of a given area to the state's economy as a whole, the anticipated needs of users of the volume, and the amount of timely and reliable information available.

In a work such as this, timeliness of the data is always a central concern to both the editor and readers. Government departments and agencies never publish data as soon as we would like. This perceived slowness is often explained by the amount of time required to gather, collate, organize, and publish the information. This process has been slowed in recent years by budget cuts which have affected most agencies of government. As a result, getting information out has become a longer process than before. For example, this almanac relies in part on information contained in the 1977 economic censuses. Some of these have been just published within the last eighteen months. Also used was government collected information about business activity on a county level. This 1980 information was published in October of 1982. In fairness, it should also be pointed out that there is a good deal of government collected information which is up to the minute by anyone's standards. Real property valuations, tax information, labor force and unemployment data, to name just a few are particularly timely. In any case, all information contained in this edition was the most recent available as of October 15, 1982, the date when the book went to press.

In designing the overall layout of the book, the goal was to produce a work that would be easy to use. Table design was crucial, and an effort has been made to produce tables which are both highly consistent with other tables in the same chapter, and generally consistent with other similar tables throughout the book. This has necessitated some revision of individual column headings and line descriptors from original sources. However, in all cases the specific meaning has remained intact, and this will not present a problem for users of this book, even if they use the almanac in conjunction with primary source material.

The editorial process has been a difficult one. What to include, what to leave out, how much detail is required, how should a table be formulated, are all problems which have been considered at length. Lots of revision and reworking were required to arrive at this finished first edition. Undoubtedly there is room for further improvement and refinement in some areas of the book. In order to make progress on this front, the help of regular users of the volume is essential. Your suggestions and comments are not only invited, but urged, in that it is largely through the help of users that the almanac can become an even better tool. Your comments should be directed to:

Source: NJ Dept of Labor

Notes: Numbers x1,000. Estimates are by two different methodologies. The Official Series is based on US Bureau of Labor Statistics monthly survey of 1,780 NJ households. The Unofficial Series is based on a combination of unemployment insurance claims, employer survey data, estimating formulas which produce more reliable data as economic indicators (NJDoL)

| Jun 1982 | 296 | 282p |

Source: NJ Dept of Labor

Notes: Numbers x1,000 p-provisional 1979-81 averages for both series. Estimates are by two different methodologies The Official Series is based on US Bureau of Labor Statistics monthly survey of 1,780 NJ households. The Unofficial Series is based on a combination of unemployment insurance claims, employer survey data, and estimating formulas which produce more reliable data as economic indicators (NJDoL)

Source: NJ Dept of Environmental Protection

Notes: 1. "Total" estimated values may differ from county summations since some hunters did not know which county they were hunting in. The values from unknown counties were included in the calculation of statewide totals found in the text, but not in county tables. These differences will be observed for estimated man-days and numbers harvested for all species.

## TABLE V.16-3 NEW JERSEY RAIL STATISTICS

| | |
|---|---|
| Number of Class I Railroads | 2 |
| Number of Class III Railroads | 6 |

Rail share of transportation involving key classes of manufactured products:

| | % of Tons | % of Ton miles |
|---|---|---|
| Chemicals and allied products | 14.0 | 26.1 |
| primary metal products | 26.6 | 37.3 |

Average rail haul on freight originating in the state (Manufactured products):
585 miles

Of rail tonnage originating in New Jersey,the primary commodity classes are:

| | Tons |
|---|---|
| miscellaneous mixed shipments, except forwarder & shipper association | 1,342,900 |
| nonmetallic minerals, except fuel | 1,342,200 |
| chemicals & allied products | 1,014,100 |
| petroleum or coal products | 972,300 |
| transportation equipment | 512,300 |
| waste & scrap materials | 384,600 |

Of rail tonnage originating in the state, the primary commodity classes are:

| | Tons |
|---|---|
| chemicals & allied products | 3,705,100 |
| food & kindred products | 3,208,300 |
| coal | 1,787,000 |
| pulp, paper & allied products | 1,765,200 |
| nonmetallic minerals, except fuel | 1,595,100 |
| transportation equipment | 1,460,800 |
